Slow Speed Wet Sharpener

JET now offers woodworkers advanced sharpening features like torque adjustment for consistent pressure to the drive shaft, variable dial speed control that maintains outer wheel speed regardless of sharpening stone diameter, and an oversized reservoir for better water management. This combination of features is not available on any other system. The JET Slow Speed Wet Sharpener is also equipped with a tool storage tray and an assortment of eight accessories that are sure to be our most popular.

Read on to see the full listing of features and accessories for the JET Slow Speed Wet Sharpener.
