

DOWNDRAFT SANDING TABLE

Bridging the gap between form and function, the new downdraft sanding table from JET® reclaims the extra space of your XACTA, Deluxe XACTA, or ProShop saw extension table and makes it a functional part of your shop once again. The included 10 non-slip grommets can be placed as you need them on the table to hold projects firmly in place while sanding. Framed with a rugged welded steel frame, it vents to a standard 4" dust collection port. Whether attached to your table saw or standing alone with the optional set of legs, this sanding table will find a useful place in your shop for years to come.

DOWNDRAFT SANDING TABLE

- The JET downdraft table design (patent pending) draws harmful dust particles away from the user without obstructing the user's movement or productivity
- 4" dust collection port connects to your dust collection system for efficient dust/chip disposal
- Includes 10 non-slip rubber grommets to help stabilize your workpiece
- The downdraft table combines a large work surface with the dust collection area

708403PK JET stand alone Downdraft Table with leg sets
