The JET® Oscillating Edge Sander showcases a unique oscillating feature. Oscillation of the belt means the sandpaper never runs a true straight line, which allows the unit to sand with more of the usable sandpaper and eliminates sanding lines. With a large sanding surface, you can process both the edge and surface of many different board sizes. Contour sanding is also an option when using the large built-in table around the drum over the motor.
OSCILLATING HORIZONTAL/VERTICAL EDGE SANDER

- **NEW oscillating feature reduces heat build-up on sanding belt**
  - to reduce loading and burning

- **Sanding belt can be locked in at vertical, horizontal and any angle in between**
  - for optimum finishing of your workpiece

- **Quick release lever and tracking control dial are conveniently located**
  - for replacing and tracking belts

- **Belt platen is made from precision-ground steel plate**
  - for accurate and true sanding results

- **Cast iron table moves up or down**
  - to provide exact workpiece positioning

- **4" dust port**
  - hooks up to your dust collection system for efficient dust removal

- **Adjustable outer drum support table**
  - enables contour sanding

- **Tilting sanding head**
  - for sanding bevels, angles, and flat surfaces
